WP RACK PLINTH DEDICATED TO RNA SERIES RACK CAB...

Plinth for Racks

black

ARTICLE CODE WPN-APT-N66

WP RACK plinth dedicated to RNA series rack cabinets with dimensions 600 × 600 mm. It raises the cabinet from the floor and creates useful lower space for cable routing and organisation.

The WP RACK plinth is specifically designed for installation at the base of compatible RNA series rack cabinets with dimensions 600 × 600 mm.

By raising the cabinet from the floor, it creates additional lower space that facilitates cable routing, distribution and organisation. It is particularly useful when cabling reaches the cabinet from below or from a raised floor, helping create a tidier and more accessible installation.
